Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

THE COLLOQUIUM LECTURE SERIES

OF THE

American Mathematical Society

I. The Boston Colloquium Lectures on Mathematics

The subjects discussed in these lectures are: I. Linear Systems of Curves on Algebraic Surfaces. By HENRY S. WHITE. II. Forms of Non Euclidean Space. By FREDERICK S. WOODS. III. Selected Topics in the Theory of Divergent Series and of Continued Fractions. By EDWARD B. VAN VLECK. There is appended an extensive bibliography of algebraic continued fractions.

For sale at the New York office of the Society. 8vo, pp. xii+187. Price $2.75; to members of the Society, $2.25.

II. The New Haven Mathematical Colloquium

I. Introduction to a Form of General Analysis. By ELIAKIM H. MOORE. II. Projective Differential Geometry. By ERNEST J. WILCZYNSKI. III. Selected Topics in the Theory of Boundary Value Problems of Differential Equations. By MAX MASON.

Published by the Yale University Press, 1910. 8vo, pp. x+222. Price $3.00 net; postage 17 cents.

III. The Princeton Colloquium Lectures

I. Fundamental Existence Theorems. By GILBERT A. BLISS. II. Differential-Geometric Aspects of Dynamics. By EDWARD KASNER.

Published by the Society, 1913. 8vo, pp. vii+224. Price $2.50; to members of the Society, $2.00.

IV. The Madison Colloquium Lectures

I. On Invariants and the Theory of Numbers. By LEONARD E. DICKSON. II. Topics in the Theory of Functions of Several Complex Variables. By WILLIAM F. OSGOOD.

Published by the Society, 1914. Price $2.50; to members of the Society, $2.00.

V. The Cambridge Colloquium Lectures

I. Functionals and their Applications. Selected Topics including Integral Equations. By GRIFFITH C. EVANS.

Published by the Society, 1918. Price $2.00 ; to members of the Society, $1.50.

CONTENTS

Vol. 22. No. 2 April 1921 Whole No. 86

PAGE

On division algebras. By J. H. M. WEDDERBURN, of Princeton, N. J. . 129

Oscillation theorems for the real, self-adjoint linear system of the second order. By H. J. ETTLINGER, of Austin, Tex. 136

New proofs of certain finiteness theorems in the theory of modular covariants. By OLIVE C. HAZLETT, of South Hadley, Mass. 144

On the convergence of certain trigonometric and polynomial approximations. By D. JACKSON, of Minneapolis, Minn. 158

Determination of all general homogeneous polynomials expressible as determinants with linear elements. By L. E. DICKSON, of Chicago, Ill. 167

Pseudo-canonical forms and invariants of systems of partial differential equations. By A. L. NELSON, of Ann Arbor, Mich. 180

Arithmetical paraphrases (II). By E. T. BELL, of Seattle, Wash. . . 198

On the zeros of solutions of homogeneous linear differential equations. By C. N. REYNOLDS, JR., of Hanover, N. H. 220

A generalization of the Fourier cosine series. By J. L. WALSH, of Cambridge, Mass. 230

Polynomials and their residue systems. By A. J. KEMPNER, of Urbana, Ill. 240

Subscriptions to the TRANSACTIONS should be addressed to the Treasurer of the Society, PROFESSOR W. B. FITE, 501 W. 116th St., New York City. The price per volume (four numbers) is $7.00. Single numbers are sold at $2.00 each.

Mathematical papers intended for publication in the TRANSACTIONS should be addressed to one of the editors:

Papers in Analysis to G. D. Birkhoff, 22 Craigie Street, Cambridge, Mass.

Papers in Geometry to L. P. Eisenhart, Princeton University, Princeton, N. J.

Papers in other fields to A. B. Coble, University of Illinois, Urbana, Ill.

Published quarterly by the American Mathematical Society, Lancaster, Pa., and 501 W. 116th St., New York City.

Press of The New Era Printing Company

Entered as second-class matter at the Post-Office at Lancaster, Pa., under the Act of October 3, 1917
